FRONT-END DEVELOPER COURSE

POWERED BY:

FRONT-END WEB DEVELOPER COURSE

Introduction

Learn from the Architects of Innovation. Tu-Code Academy, the training arm of Ryantech Solutions, equips you with the skills to build modern, responsive, and user-focused web applications. This course goes beyond basic design because you will learn how to create interfaces used in real-world systems such as dashboards, reporting tools, and business platforms.

Why Choose This Course?

- Learn industry-standard front-end development
- Build real-world user interfaces, not just static pages
- Get mentorship from active software engineers
- Develop a strong portfolio of practical projects

What You Will Learn:

- HTML5 & modern web structure
- CSS3 (Flexbox, Grid, Responsive Design)
- JavaScript (Core concepts & DOM manipulation)
- UI/UX principles for real-world applications
- Working with APIs (connecting to back-end systems)
- Version control using Git & GitHub

Tools & Technologies

HTML | CSS | JavaScript | Bootstrap/Tailwind | Git & GitHub | React Framework.

Hands-On Projects

- Responsive business websites
- Interactive dashboards (front-end only)
- Landing pages for corporate clients
- Mobile-friendly web applications

Who Should Enroll?

- Beginners entering tech
- Graphic designers transitioning to web
- Anyone passionate about design & user experience

OUTCOME

- Build responsive, professional websites
- Create interactive user interfaces
- Work with developers on real systems
- Present a strong front-end portfolio

DURATION

60 Hours (2Hrs/Day) Total:1.5 Months
Flexible learning with structured guidance

MONETIZE

Graduate with systems you can demo, code you can defend, and experience you can sell.

What Are The Requirements To Join?

Must own a laptop & basic computer knowledge

Proficiency in spoken and written English

Form IV graduate and above

Internet connection access

Flexible Payment Structure:

What Our Graduates Say:

I had a great experience at Tu-Code Academy. Being trained by developers from Ryantech Solutions who work on real client systems made the learning practical, hands-on, and helped me build real skills fast.
